

Agrilus planipennis

Written by Foster Brown © 2019

Have you seen, have you heard about *Agrilus planipennis*?

Say what? *Agrilus planipennis*

Have you seen, have you heard about *Agrilus planipennis*?

It's a beetle not a bug, a pest not to shrug.

They're killing ash trees all around.

Come a little closer, I'll tell you about

Agrilus planipennis

Have you seen, have you heard about *Agrilus planipennis*?

Say what? *Agrilus planipennis*

Have you seen, have you heard about *Agrilus planipennis*?

They're small and pretty, but nasty and gritty

As they eat their way through the bark.

These green little devils are insect rebels...

Agrilus planipennis

It's the Emerald Ash Borer Beetle; this name you may know.

They devour the cambium layer to stop the water and nutrient flow.

We gotta bop 'em and stop 'em, halt 'em in their tracks,

We got to work to get our ash trees back.

We gotta pull our thoughts together

and stop *Agrilus planipennis*

Agrilus planipennis

It's a beetle not a bug, a pest not to shrug.

They're killing ash trees all around.

These green little devils are insect rebels...

Agrilus planipennis

Say What? *Agrilus planipennis*

Emerald Ash Borer Beetle
